CWM funding call for 2024

<https://www.mathunion.org/cwm>

The IMU **Committee for Women in Mathematics** (CWM) invites proposals for funding of up to €3000 for activities or initiatives to support women in mathematics taking place from February 2024 to February 2025. Applications should be submitted **by January 05, 2024**, via the IMU dedicated webform. This application process has two steps:

- 1) First you need to login to the IMU website with your credentials or create a new account in the link: <https://www.mathunion.org/user/login>
- 2) Once logged in to the IMU website, you can access the CWM call webform and submit your application in the link: <https://www.mathunion.org/cwm/call-2024>

Proposals should fall under one of the following categories:

- a) **Establishing or supporting networks for women in mathematics**, preferably at the continental or regional level, with priority given to networks in developing countries. Activities could include, for example, creating videos, films or exhibitions, organizing mathematical activities or round-tables, setting up or improvement of websites, etc.
- b) **Research workshops geared towards establishing research networks for women.** Research Collaboration Conferences for Women demonstrate successful models of such events. These are week-long conferences, where junior and senior women work together on pre-defined research projects. Events organized for developing countries will have priority. Events for developed countries may be considered if CWM funding is used to support participants from developing countries, and this must be explicitly stated in the application. We recognize that the organization of these events may take longer. Therefore, we will also consider events that take place in 2025 for this category.
- c) **Other ideas** for researching and/or addressing issues encountered by women in mathematics.

For any of these categories, budget can include travel and/or accommodation expenses for participants from developing countries, infrastructure and logistics, childcare, etc.

Note that **funding for individual research projects is not available.**

Proposers should write a **short description** (no more than three pages) explaining the nature and structure of their activity and how it fulfils the aims of the call, as well as indications on how the CWM funding would be used. Proposals should also include a detailed budget, indicating sources of funding, if available.

The application must be written in English.

This will be the only call for applications regarding activities in 2024. Applications should be submitted **by January 05, 2024**. Depending on budget availability, successful applications may not be funded in full. Successful applicants will be informed no later than February 16, 2024.

If you have any questions about the CWM call or encounter any problem accessing the webform, please email us at applications-for-cwm@mathunion.org.
