INTERNATIONAL MATHEMATICAL UNION

EXECUTIVE COMMITTEE

(1 January 1975 - 31 December 1978)

President	Professor Deane Montgomery
Vice-Presidents :	Professor J.W.S. Cassels Professor G. Vranceanu
Secretary :	Professor J.L. Lions
Members :	Professor E. Bombieri Professor M. Kneser Professor O. Lehto Professor M. Nagata Professor L.S. Pontryagin
Psst President :	Professor K. Chandrasekharan

GENERAL ASSEMBLY OF IMU

We reproduce below the "First Communication" already printed in Bulletin No. 11 of July 1977, without changes, except in Section 1 where more detailed information is given on the place of Assembly.

1. PLACE AND DATE OF ASSEMBLY

The Eight General Assembly of the International Mathematical Union will be held at OTANIEMI, about 10 km from the centre of HELSINKI, in the Congress Centre "DIPOLI". The working days will be August 11 and 12, and if necessary, August 13. The registration will start on August 11 at 8.30 o'clock and the opening session at 10.00. The delegates are therefore advised to arrive in the Helsinki area not later than August 10, 1978.

2. DELEGATIONS AND THEIR VOTING STRENGTH

According to the Statutes of the Union, each National Adhering Organization "shall appoint and certify to the Secretary of the Union a delegation which shall have the number of votes corresponding to the Group in which it adheres as follows :

Group	I	II	III	IV	V
Number of votes	1	2	3	4	5

provided that the number of delegates shall not exceed the corresponding number of votes. Any National Adhering Organization which desires to ensure its full quota of representatives at meetings of the General Assembly by the appointment of alternates for its regularly named delegates may do so, provided that no such alternate shall be permitted to participate in the work of the General Assembly until he has been duly certified to the Secretary of the Union as assuming the powers and duties of the delegate he has been designated to replace. No person shall be a member of the delegation of more than one country. Voting by the General Assembly shall be by delegations, provided that each delegation shall be free to cast the votes to which it is entitled either as a unit or divided in such a manner as it may determine".

3. DELEGATES AND ALTERNATES AND THEIR PARTICIPATION

It follows from the above extract from the Statutes that :

- a) the number of regular delegates from a member-country cannot exceed the number of its votes (it can, of course, be smaller) ;
- b) the number of alternates cannot exceed the number of regularly named delegates (there may, of course, be no alternates at all) ;
- c) at any given session of the General Assembly, the total number of delegates either regular or alternate, representing a member-country, cannot exceed the number of votes

of that member-country ;

- d) and that the alternate delegates are permitted to participate in the work of the Assembly only after due notification to the Secretary.

4. APPOINTMENT OF DELEGATIONS

You are hereby requested to designate the delegation of your country. The names of your delegates, with alternates, if any, together with their addresses, may be please entered on the accompanying blank and returned, so as to reach the undersigned not later than March 1, 1978.

This deadline is important since some of the delegates will be proposed for election to various Committees of the Assembly at the opening session.

Further information for the stay in OTANIEMI will be given in the Second Communication.

5. PROPOSALS FOR AGENDA

As provided for in the By-Laws of the Union, National Adhering Organizations may propose business to be transacted at the General Assembly ; such proposals shall reach the undersigned at least four months before the meeting, i.e. not later than April 11, 1978.

6. ELECTION OF THE NEW EXECUTIVE COMMITTEE

The present Executive Committee of the Union is now about to prepare its recommendation to the next General Assembly regarding the composition of the new Executive Committee for the term January 1, 1979 to December 31, 1982. As in the past, the present Committee would like to receive suggestions from National Committees regarding the composition of the new Executive Committee including its officers ; in particular, regarding the representation of the member-countries in the Committee. It should be understood that, while the present Executive Committee would give such suggestions due consideration in arriving at its own recommendation, it would in no sense be bound by such suggestions. To be bound, would, in fact, amount to an abdication of its own responsibility, which no member of the Union desired.

Suggestions from National Committees should reach the undersigned not later than February 15, 1978. The Executive Committee would like it to be clearly understood that no member of the Committee is elected to represent his country ; he is elected on his own merits, and is expected to serve the whole community of mathematicians which the Union represents.

7. AGENDA

The Agenda of the meeting will be sent later.

8. I.C.M.I.

According to the terms of reference of I.C.M.I. (International Commission on Mathematical Instruction), approved by the 4th General Assembly in 1962, the General Assembly of IMU elects ten members-at-large of I.C.M.I. on the nomination of the President of IMU. It also elects the President of I.C.M.I. on the nomination of the President of IMU. On the other hand, any National Adhering Organization wishing to support or encourage the work of I.C.M.I. may create or recognize, in agreement with its National Committee, a National subcommission for ICMI to maintain liaison with the Commission in all matters pertinent to its affairs. The National Adhering Organization in question shall designate one member of the said subcommission, to serve as a delegated member of I.C.M.I.

Each National Adhering Organization is hereby requested to give the undersigned, not later than February 28, 1978 :

- 1) the name of the national delegate which it designates to serve as a member of I.C.M.I. for the term January 1, 1979 to December 31, 1982, with a copy addressed to the Secretary of I.C.M.I., Professor Y. Kawada, Department of Mathematics, University of Tokyo, Hongo, Bunkyo-ku, Tokyo 113, Japan,

and

- 2) the names of possible candidates for election as members-at-large, for the term 1979-1982.

9. COMMISSION ON EXCHANGE

According to the terms of reference of the Commission on Exchange approved by international postal ballot in 1976, the General Assembly of IMU elects nine members-at-large of the Exchange Commission on the nomination of the President of IMU (the tenth member being the Secretary of the Union, ex-officio). It also elects the President of the Commission on Exchange on the nomination of the President of IMU.

Each National National Adhering Organization is hereby requested to give the undersigned not later than February 28, 1978 :

- the names of possible candidates for election as members-at-large for the term 1979-1982.

Jacques-Louis Lions
Secretary of IMU

IMPORTANT INFORMATIONS FOR I.C.M.'78TRAVEL GRANTS FOR YOUNG MATHEMATICIANS

The International Mathematical Union, with the help of ICSU, UNESCO and COSTED, has established a fund to facilitate the participation of well-qualified young mathematicians at the International Congress to be held at Helsinki, Finland, from August 15 to 23, 1978.

The fund is primarily for young mathematicians from developing countries (not necessarily members of IMU), but deserving cases from countries where severe money regulations exist will also be considered.

The total sum available is of US Dollars 10,000. It may not be possible to help all deserving cases. Grants will not cover the full expenses of those who are selected.

You are hereby requested to nominate young mathematicians from your country who are well-qualified and need financial support. You should give the names in order of priority together with addresses, brief curriculum vitae and any supporting evidence you wish to submit.

Candidates should in no case be more than 35 years old. The names of those invited as speakers to the Congress should not be included in your list.

Would please send your nominations so as to reach the undersigned not later than February 1st, 1978 ?

INTERNATIONAL CONGRESS OF MATHEMATICIANS 1982

On behalf of the Executive Committee of IMU, invitations from prospective host for the ICM 1982 should reach the Secretary of IMU before February 1st, 1978.

FINANCIAL REPORT

for the period January 1st to December 31st, 1976

1. INCOME

The Union had the following sources of income during the year :

- A). Dues from the member nations,
- B). UNESCO/ICSU contribution,
- C). Sales of the World Directory of Mathematicians,
- D). Interests on Bank Accounts.

A). During the financial year 1975, dues were paid at the :

i) CHASE MANHATTAN BANK, by :

Argentina	I	1976 (part)
Czechoslovakia	III	1976
Greece	I	1975 (part) (*)
India	III	1975 (part)
Mexico	I	1975 (part)
Nigeria	I	1975 (remaining part)
		1976

Total : US\$ 1,998 -

(*) balance paid in Swiss Frs.

Brought forward : US\$. 1998.-

ii) SWISS CREDIT BANK, by :

Australia	III	1976
Austria	II	1976
Canada	III	1975
Cuba	I	1976
Denmark	II	1976
Finland	II	1976
German Dem. Rep.	III	1976
Greece	I	1975 (remaining part)
"		1976
Hungary	III	1976
Iceland	I	1975
Iran	II	1976
Ireland	I	1976
Israël	II	1975 (remaining part)
"		1976
Italy	IV	1976
Japan	V	1976
Netherlands (The)	III	1976
New-Zealand	I	1976
Norway	I	1976
Poland	IV	1976
"		1977
Rumania	II	1976
South Africa	II	1976
Spain	II	1976
Sweden	III	1976
Switzerland	III	1976
China-Taiwan	I	1975
U.R.S.S	V	1976
United Kingdom	V	1976
U.S.A.	V	1976
Yugoslavia	II	1976

Total Sw.Frs. 68.678.- US\$ 27.258.-

US\$. 29.256.-

Brought forward : US\$. 29,256.-

iii) SOCIETE GENERALE, by :

Arab Rep. of Egypt	I	1976	SF. 600.	US\$. 242.-

TOTAL INCOME FROM MEMBERSHIP DUES IN 1976^(*) US\$. 31,796.-
=====

Subscriptions were due at the end of 1976 from the following countries :

1974 : Brazil.

1975 : Brazil, India (part).

1976 : Brazil, Iceland, India, Mexico.

The following subscriptions for 1976 were paid at the beginning of 1977 :

Argentina (remaining part), Belgium, Bulgaria, Canada, Rep. of China-Taiwan, Fed. Rep. of Germany, Democratic People's Rep. of Korea, Portugal, Turkey.

1977 : Dues were paid in advance by Poland.

B) UNESCO/ICSU contribution for 1976 :

Frs.frs.	28.200.-	
US\$.	6,000.-	US\$. 12,267.- =====

C) SALES from the WORLD DIRECTORY OF MATHEMATICIANS:

Krs.S.	5.687.-	US\$ 1,293.- =====
--------	---------	-----------------------

(*) Exchange rates at the date of bank statements following UNESCO standard rates of exchange.

D) a. INTERESTS on Bank Accounts :Swiss_Credit_Bank (private account)

Sw.Frs. 2.218.- = US\$. 909.-

Svenska_Handelsbanken (private account)

MARSTON MORSE

Professor Marston Morse, of the Institute for Advanced Study, died on June 22 at his home in Princeton. He was universally regarded as one of the world's greatest mathematicians. His interests in mathematics were broad and spread over analysis, topology, calculus of variations, differential geometry and dynamics. Much of his work centered around analysis in the large, that is a combination of analysis and geometry. In addition to his eminence in mathematics, he was a statesman of science and was influential in shaping its development. He and Father Hesburgh represented the Vatican at the Atoms for Peace Conference at the United Nations in 1952.

He was born March 24, 1892, in Waterville, Maine. His A.B. was taken at Colby College in 1914, and his Ph.D. at Harvard, 1917. His career from 1919 to 1935 centered at Harvard but he was at Cornell from 1920 to 1925, and at Brown University, 1926-1926. In 1935 he became a professor at the newly founded Institute for Advanced Study. He was one of its great original faculty in mathematics which included Alexander Einstein, von Neumann, Veblen, and Weyl. He was a professor there until his death, having become emeritus in 1962.

His academic career was interrupted by the two world wars. In the first he served with distinction in the American Expeditionary Force and received the Croix de Guerre with silver star for bravery under fire. Other decorations came to him in World War II in which he made major contributions in applied mathematics in the Office of the Chief of Ordnance. He received the Ordnance Department Meritorious Service Award from the President of the United States in 1944, and the Army-Navy Certificate of Merit in 1948.

His mathematical achievements were widely recognized. He received twenty honorary doctorate degrees from universities around the world including Harvard, Paris, Pisa, Vienna, Yeshiva, Notre Dame, Fordham, and Maryland. He was elected to the National Academy of Sciences in 1932, to the American Philosophical Society in 1936, and the American Academy of Arts and Sciences. He was President of the American Mathematical Society, 1940-1942. He was appointed by the President of the United States to the first National Science Foundation Board, 1950-1954, and became a "Chevalier" in the French National Order of Legion of Honor in 1952. He was an associate member of the French Academy of Sciences, and a corresponding member of the Italian National Academy Lincei. He received the National Medal of Science in 1964, presented at the White House in 1965 by President Johnson. He was honored by the Polish and Romanian academies and received many other honors for his major role in international science.

He was a man of wide cultural interest with a lifelong devotion to the piano. He was also interested in sports having been a captain of the Colby Tennis Team. He was very influential with young people and associated with them freely from the beginning of his career to the very last day of his life. He enjoyed foreign contacts and took a special interest in France. His immense influence was world wide among people of all ages. He was regarded everywhere with affection and respect.

Marston Morse, with the assistance of the late J.R. Kline, was responsible for convoking an assembly of representative mathematicians from all over the world in August 1950, with a view to establishing anew the International Mathematical Union (which had come to an end in 1932). He presided over the opening session and passed the mantle on to Marshall Stone, who, in due course, became the first President of the revived Union. When the Union called on his services again, he agreed, with his wonted generosity of heart, to serve as a Vice-President for four years beginning 1959. He played an important part in steering the Union clear of both politics and patronage, and did a great deal to enhance its prestige among the research mathematicians of the world.
